

# Furon® Gauge Protector

## Single & Double, Molded Diaphragms

### Description

Furon Gauge Protectors isolate metal pressure gauges and transducers from potentially damaging media, protecting downstream equipment. Furon Gauge Protectors utilize a PTFE diaphragm to isolate the process chemistry from the filler fluid. Double-diaphragm gauge protectors offer dual containment protection against aggressive or high-temperature process chemistries. Innovative design features dual fill ports for the isolation media, allowing for easy fill and purge. A variety of isolation media may be used, including glycerin, DI water, and IPA/DI mixtures. Furon Gauge Protectors are 100% metal and elastomer free, contributing to longer product life and significantly reducing the potential for leakage or contamination. A wide variety of configurations is available to accommodate the requirements of virtually any application. Options include flow-through tees which are fuse-bonded to eliminate the potential for thread leakage, pressure transducers with digital display, and custom end connections.

### Applications

- Commonly used to indicate remaining filter life
- Isolates metal pressure gauges or transducers from corrosive or aggressive media
- Suitable for use in abrasive slurry
- Protects high-purity media from potential contamination caused by pressure gauges or transducers
- Eliminates media hold-up volumes common in gauges and transducers

### Features and Benefits

- Isolates metal gauge or pressure transducer from media
- 100% non-metallic construction
- All high purity molded PFA body; PTFE diaphragm
- Proprietary diaphragm seals with no hold up volume or elastomers
- Easy fill/bleed dual fill ports
- Variety of mounts optional including fuse bonded flow-thru tee option
- Optionally available with pressure gauge installed

ASK AN ENGINEER

## Furon Pressure Gauge Protector - Single Diaphragm

Part Number	End Connection	Gauge Mounting	Gauge Rating
GPMSO-1440-0-0	1/4" FNPT	1/4 - 18 FNPT	Without Gauge
GPMSF-1440-A-DI	1/4" FNPT	1/4 - 18 FNPT	0 - 15 PSIG
GPMSF-1440-B-DI	1/4" FNPT	1/4 - 18 FNPT	0 - 30 PSIG
GPMSF-1440-C-DI	1/4" FNPT	1/4 - 18 FNPT	0 - 60 PSIG
GPMSF-1440-D-DI	1/4" FNPT	1/4 - 18 FNPT	0 - 100 PSIG
GPMSF-1440-E-DI	1/4" FNPT	1/4 - 18 FNPT	0 - 160 PSIG

## Furon Pressure Gauge Protector - Double Diaphragm

Part Number	End Connection	Gauge Mounting	Gauge Rating
GPMDO-1440-0-0	1/4" FNPT	1/4 - 18 FNPT	Without Gauge
GPMDF-1440-B-DI	1/4" FNPT	1/4 - 18 FNPT	0 - 30 PSIG
GPMDF-1440-C-DI	1/4" FNPT	1/4 - 18 FNPT	0 - 60 PSIG
GPMDF-1440-D-DI	1/4" FNPT	1/4 - 18 FNPT	0 - 100 PSIG
GPMDF-1440-E-DI	1/4" FNPT	1/4 - 18 FNPT	0 - 160 PSIG

## Ordering & Technical Specifications

Maximum Media Temperature	302°F (150°C)
Maximum Pressure	120 psig (8.3 bar) at room temperature
Accuracy	5% of full scale (when ordered with gauge installed)
End Connection	1/4" FNPT
Gauge Port	1/4" FNPT
Fill Fluid	Deionized (DI) water

## Options

- Flow-through tee - fuse bonded to Gauge Protector. [Please consult factory](#) for further details >>
- Alternate fill fluids

## Notes

Gauge protector accuracy performance directly related to the amount of air trapped while filling the gauge and pressure transducer chamber. Minimum gauge accuracy of 5% of full scale when filled by Furon Fluid Handling Product manufacturing facility. Units filled by customer may result in varied level of accuracy.
